KUCHING: A joint-venture project between Naim Engineering Sdn Bhd and Hock Peng Furniture and General Contractor Sdn Bhd was adjudged the winner of Qlassic Excellence Awards 2016 in the Non-Residential (large) category recently.

The award was for the JV's University College of Technology Sarawak (UCTS) (Phase 2, Stage 1) project in Sibü.

In addition, the project also received the High Qlassic Achievement accolade for the highest score achieved for any project in the 2016's Awards.

The awards, organised in conjunction with the Qlassic Day 2016, recognised Malaysia's construction industry players for their commitment and dedication to achieving quality in workmanship.

Developed by Malaysia's Construction Industry Development Board (CIDB), the Quality Assessment System in Construction or Qlassic is an assessment system that measures and evaluates the workmanship quality of a building's construction work based on the country's construction industry standard (CIS).

Naim Group of Companies' deputy managing director Christina Wong said the award was a testament of Naim's continued commitment in quality workmanship for projects.

"We are indeed honored to have been adjudged the winner of this coveted award. We are also thankful to our

JV partner, Hock Peng for its efforts, and the client for the opportunity to be involved in the project, the scope of which included civil and structural works, external works and mechanical and electrical works.

“Indeed, the award instils in us, a need to continuously improve. Hence, we will continue to learn and raise the bar in terms of construction workmanship quality for the benefit of our clients and end-users,” she said.
